30th WAIPA World Investment Conference

Promoting Investment for Shared Prosperity: Resilient and Sustainable

10–12 November 2026 | Geneva, Switzerland

The global investment landscape is being reshaped by converging challenges and opportunities. Geopolitical tensions, trade fragmentation, technological disruption, supply chain reconfiguration, and tighter financing conditions are altering how investors allocate capital and how countries compete for it. At the same time, transitions in energy, AI and digital infrastructure, advanced manufacturing, health, food systems, and services are creating new avenues for investment-led growth. In this context, investment promotion is becoming more strategic: the objective is not only to attract more investment, but to attract investment that is resilient, productive, inclusive, and sustainable.

The World Investment Conference (WIC), WAIPA's flagship annual event, has served since 1996 as the leading global platform for dialogue on international investment. Bringing together key stakeholders of the global investment community—including senior policymakers, business executives, IPA heads, and international organizations—the Conference provides a unique forum to assess global investment trends, share practical experience, build partnerships, and advance investment for development. With WAIPA's membership spanning over 110 countries, the Conference reflects the diversity and universality of the global investment promotion community.

The 30th edition of WIC returns to Geneva, the birthplace of WAIPA and the seat of its Permanent Secretariat, marking three decades of connecting capital with opportunity. Under the theme "Promoting Investment for Shared Prosperity: Resilient and Sustainable," WIC 2026 is expected to attract 3,000–4,000 participants and feature sessions and engagements across seven pillars: Leaders Vision, Development Strategies, Sectoral Resilience, Partner-led Competitiveness, Partner-led Sustainability, Executive Focus, and Business Engagement. Together, these sessions will address the major issues shaping investment today and tomorrow—from industrial policy and sustainable finance to digital infrastructure, supply chain resilience, responsible business conduct, and domestic value creation.

WIC 2026 aims to deliver practical outcomes for the global investment promotion community: stronger partnerships, sharper policy and institutional tools, more effective business engagement, and a renewed agenda for mobilizing investment in support of shared prosperity. At a time of uncertainty and transition, the Conference will provide a platform to align global vision with practical action.
